I'm looking for an SEO expert to execute a backlink strategy by leveraging competitors that have ceased operations but still have a strong SEO presence. The goal is to identify backlinks to their content, replicate their high-performing blogs with enhanced content, and reach out to referring domains to suggest linking to my site instead.

Key Responsibilities

Backlink Analysis: I can most likely do this myself and provide the target posts and referring domains, however open to a freelancer doing this as well if it makes more sense to do so.

Content Replication: Plan and create high-quality, SEO-optimized content based on the competitors' most-linked blog posts. I'm ok with this being produced primarily with AI to keep costs down as it is primarily intended to get the backlink versus rank for SEO to start. (if we are successful in getting the backlinks, we would then need to go in and implement better SEO practices to make the content more unique to rank higher.

Outreach: Contact referring domains using a personalized "skyscraper technique," highlighting that the competitor is inactive and offering my content as a superior replacement.

If successful, this project could expand into broader SEO opportunities.

Please reply with a thoughtful response indicating you understand the requirements versus a copy/paste response.

PROPOSAL

Onsite SEO and Backlink Creation Expert Needed

We are seeking an experienced SEO specialist to enhance our website's onsite optimization and develop a robust backlink strategy. The ideal candidate will have a strong understanding of SEO best practices, keyword research, and link-building techniques. You will be responsible for optimizing website content, improving site structure, and acquiring quality backlinks from reputable sources. If you have a proven track record in driving organic traffic and increasing search engine rankings, we would love to hear from you

Proposal

Michael Hi, I've helped businesses go from "barely showing up" to dominating their niche in search results by focusing on ON-PAGE work and white-hat LINK Building. Look at my success story: <https://bit.ly/3zovcUc> I managed to RANK Fast Labour Hire at #1 for their main commercial keywords on Google, increasing their ORGANIC TRAFFIC by 215%.

First, I do a complete SEO audit to identify quick wins and deeper issues, things like technical errors, missed keyword opportunities, and content gaps. Then I work on optimizing meta tags, improving site structure, and making sure everything aligns with search intent. On the backlink side, I focus on quality over quantity, getting links from relevant, trustworthy sites through manual outreach, guest posting, and strategic partnerships. No spammy links or shortcuts, just clean, white-hat tactics that improve authority and actually stick.

Let me know if you'd like me to run a quick audit, happy to offer that upfront. If you're aiming for real, measurable growth, I'd love to work together.
